## Job Objective

Detail-oriented Front-End / React Developer with hands-on experience in Node.js, targeting **Full-Stack Development** roles to contribute technical expertise in building scalable back-end services and intuitive, high-impact web applications that enhance user experience and drive business value in a growth-oriented organization.

## Education

- 2020 **B.Tech. in Computer Science**  
Jawaharlal Nehru Technological University, Kakinada
- 2016 **XII<sup>th</sup>**, Narayana College
- 2014 **X<sup>th</sup>**, Saranya Concept School

## Core Competencies

- ❖ Full-stack Development
- ❖ Software Development Frameworks
- ❖ Unit Testing
- ❖ Risk Management
- ❖ Requirement Gathering
- ❖ Solution Optimisation
- ❖ Incident Resolution
- ❖ Disaster Recovery Management
- ❖ Root Cause Analysis
- ❖ CI & CD Set-up & Process

## Technical Skills

- ❖ **Front-end:** React.js, Redux, JavaScript (ES6+), HTML5/CSS3, Tailwind CSS, Material Ui
- ❖ **Back-end:** Node.js, Express.js, RESTful APIs
- ❖ **Database:** MongoDB, SQL
- ❖ **DevOps/Tools:** Docker, Git, CI/CD, Postman, swagger

## Personal Details

- ❖ **Date of Birth:** 22<sup>nd</sup> October 1998
- ❖ **Languages:** English, Hindi
- ❖ **Address:** Ramachandrapuram, 533305

## Profile Summary

- ❖ Front-End Engineer with **over 4 years of professional experience** in delivering scalable, high-performance web applications for enterprise and government clients.
- ❖ Currently working as **React Developer-Production Support Engineer** at **Intense Technologies**, contributing to client-facing and in-house products across telecom, fintech, and government domains.
- ❖ Collaborated with **Cross-functional Teams** to integrate back-end services and APIs, increased data synchronization **efficiency by 25%**.
- ❖ Understanding of Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications.
- ❖ Gained exposure on process requirements and provided use cases for business, functional & technical requirements.
- ❖ Developed scalable and high-performance back-end services using **Node.js** and **Express.js**, implementing RESTful APIs, business logic, and secure database integration with MongoDB to support seamless application functionality.

## Work Experience

### React Developer-Production Support

#### Intense Technologies Hyderabad | Oct'2021-Present

- ❖ Designing and enhancing scalable front-end applications using React.js, JavaScript, and REST APIs for enterprise clients including BSNL and Infosys.
- ❖ Executing testing, debugging, and performance optimization activities, strengthening code quality, reliability, and long-term maintainability.

#### Achievements:

- ❖ Modernized legacy Java-based applications by transitioning them to React-driven architectures, achieved 35% reduction in page load times.
- ❖ Supported and monitored 50+ production batch processes, maintained 99.9% system uptime and operational stability.

## Internship

### Intern | Intense Technologies Hyderabad | Jul'2021-Sep'2021

- ❖ Assisted in the design, development, and testing of software features under senior developer guidance.
- ❖ Supported debugging, bug fixing, and performance optimization across development cycles.

## Projects

### Uniserve360 Design — Intense Technologies Hyderabad

**Description:** Developed a React-based design platform enabling users to create and export reusable project templates as HTML pages. Improved design productivity by 40% through reusable UI components, efficient state management using React Hooks and Context API, and optimized cross-application component integration.

### ITD E-Filing Forms — Infosys (Client Project) Hyderabad

**Description:** Contributed to the modernization of the Income Tax Department's e-filing portal by building responsive and accessible digital workflow using the Uniserve NXT low-code platform. Reduced form completion time by 30% and ensured 24x7 service continuity through production and incident support.

### Jupiter Website [Link](#) Hyderabad

**Description:** Co-developed a hospital management web application to streamline work orders and maintenance operations. Built responsive UIs using React.js, Redux Toolkit, and Bootstrap, and developed scalable back-end services with Node.js, Express.js and MongoDB.

**Tools Used:** React.js, Redux Toolkit, Bootstrap, Ant Design, Node.js, Express.js, MongoDB, JWT token

### Series ME (In-house Product) — Intense Technologies Hyderabad

**Description:** Built a secure digital marketplace for trading unlisted company shares using low-code technology. Integrated KYC verification, payment gateways, and digital contracts, streamlining end-to-end trading workflow and reducing manual processing effort by 50%.

### BSNL 2.0 — Intense Technologies Hyderabad

**Description:** Led the migration of a legacy Java-based telecom service portal to React.js, enabling dynamic form rendering and centralized state management. Enhanced validation and user experience, reducing customer onboarding time by 20%, while actively contributing to Agile delivery, Git-based version control, and end-to-end testing.
